Study of the mind and human brain is one of the most exciting and important areas of today's science. You will obtain wide-ranging knowledge of

A University of London degree from anywhere in the world

A trusted name in global education

The University of London is one of the world's leading universities, internationally recognised for its high academic standards. This reputation is based on the outstanding teaching and research of our 17 federation members.

In 1858, we made our degrees available to study anywhere in the world. Today, we have more than 40,000 students in over 190 countries, studying on 100-plus degrees, diplomas and certificates.

A University of London degree

Undergraduate degrees of the University of London are awarded with Honours. The award certificate will indicate the level of the academic performance (Honours) achieved by classifying the award. The classification of the degree will be based on the ratified marks from the completed assessments. The standard classification system for bachelor's degrees with Honours is:

- First Class
- Upper Second Class
- Lower Second Class
- Third Class.

A Pass Degree or Ordinary Degree is a degree without Honours. Specific rules for the classification of awards are given in the Programme Regulations, under Scheme of Award.

The FHEQ framework

The UK Quality Assurance Agency for Higher Education has prepared a framework for classifying the level of courses to permit the comparability of those taught in different institutions. University undergraduate courses are classified at three levels corresponding to standard three-year undergraduate degrees: Level 4 (introductory), Level 5 (intermediate) and Level 6 (advanced). (Levels 1–3 describe pre-University courses and Level 7 is graduate level for master's degrees.)

Why study psychology?

The BSc Psychology programme is a contemporary approach to the discipline, with a focus on creativity, independence and applied learning.

A pioneering degree

This programme will provide you with a thorough understanding of psychology as a science, covering the core areas of psychology and their application.

There is an emphasis on research and its application as well as on the use and acquisition of psychological knowledge through exposure to real-world issues.

As a graduate of this programme, you will be able to:

- demonstrate a sound understanding of all the main areas of psychology
- demonstrate the ability to exercise critical judgement in the evaluation of research in the field
- apply a critical understanding of essential concepts, principles and research in psychology, and critically evaluate the results, in the context of loosely defined scenarios, using structured arguments based in empirical evidence

- demonstrate the ability to produce a substantial piece of original or empirical research work including, for example, study design, data collection, analysis and reporting.

Where can it lead?

Studying psychology opens up opportunities to develop your career across a range of sectors such as education, healthcare, social care, criminal and legal services.

Your degree could lead to a career in areas such as forensic psychology, health psychology, youth services, counselling or human resource management.

Local recognition

In some countries, qualifications earned by distance and flexible learning may not be recognised by certain authorities or regulators for the purposes of public sector employment or further study.

We advise you to explore the local recognition status before you register, even if you plan to receive support from a Recognised Teaching Centre.

For more details on Recognised Teaching Centres, visit:
bit.ly/recognised-centres

The Institute of Psychiatry, Psychology & Neuroscience (IoPPN) at King's College London is the largest academic

How you study

The programme offers a variety of highly engaging learning materials and activities.

Your learning experience will be enhanced with an accessible and attractive learning platform, opportunities for self-assessment, so you can understand your own progress, and enhanced online student support.

*Please note, the research project relates to 45 credits overall split into two elements: one 15-credit research project preparation module and one 30-credit research project.

Study modules

Programme modules cover a range of areas including healthcare, social care, education and law.

For further information on intermediate qualifications and available modules, please visit: london.ac.uk/psychology-online

Entrance requirements and further information

Entry criteria

You should normally have at least:

- three UK GCE A-levels at grade DDE or an acceptable equivalent
- one of these A-levels must be obtained in maths, psychology or biology at grade A–D
- a UK GCSE maths grade A–C/9–4 or equivalent and
- be age 17+ by the registration deadline of your enrolment session.

We accept qualifications from all around the world; for details of these visit: bit.ly/psychology-entry-reqs

Performance-based entry

If you do not meet the minimum entry requirements, you may still be eligible to apply through the performance-based route. For further information visit: bit.ly/psychology-entry-reqs

What if I do not meet the above criteria?

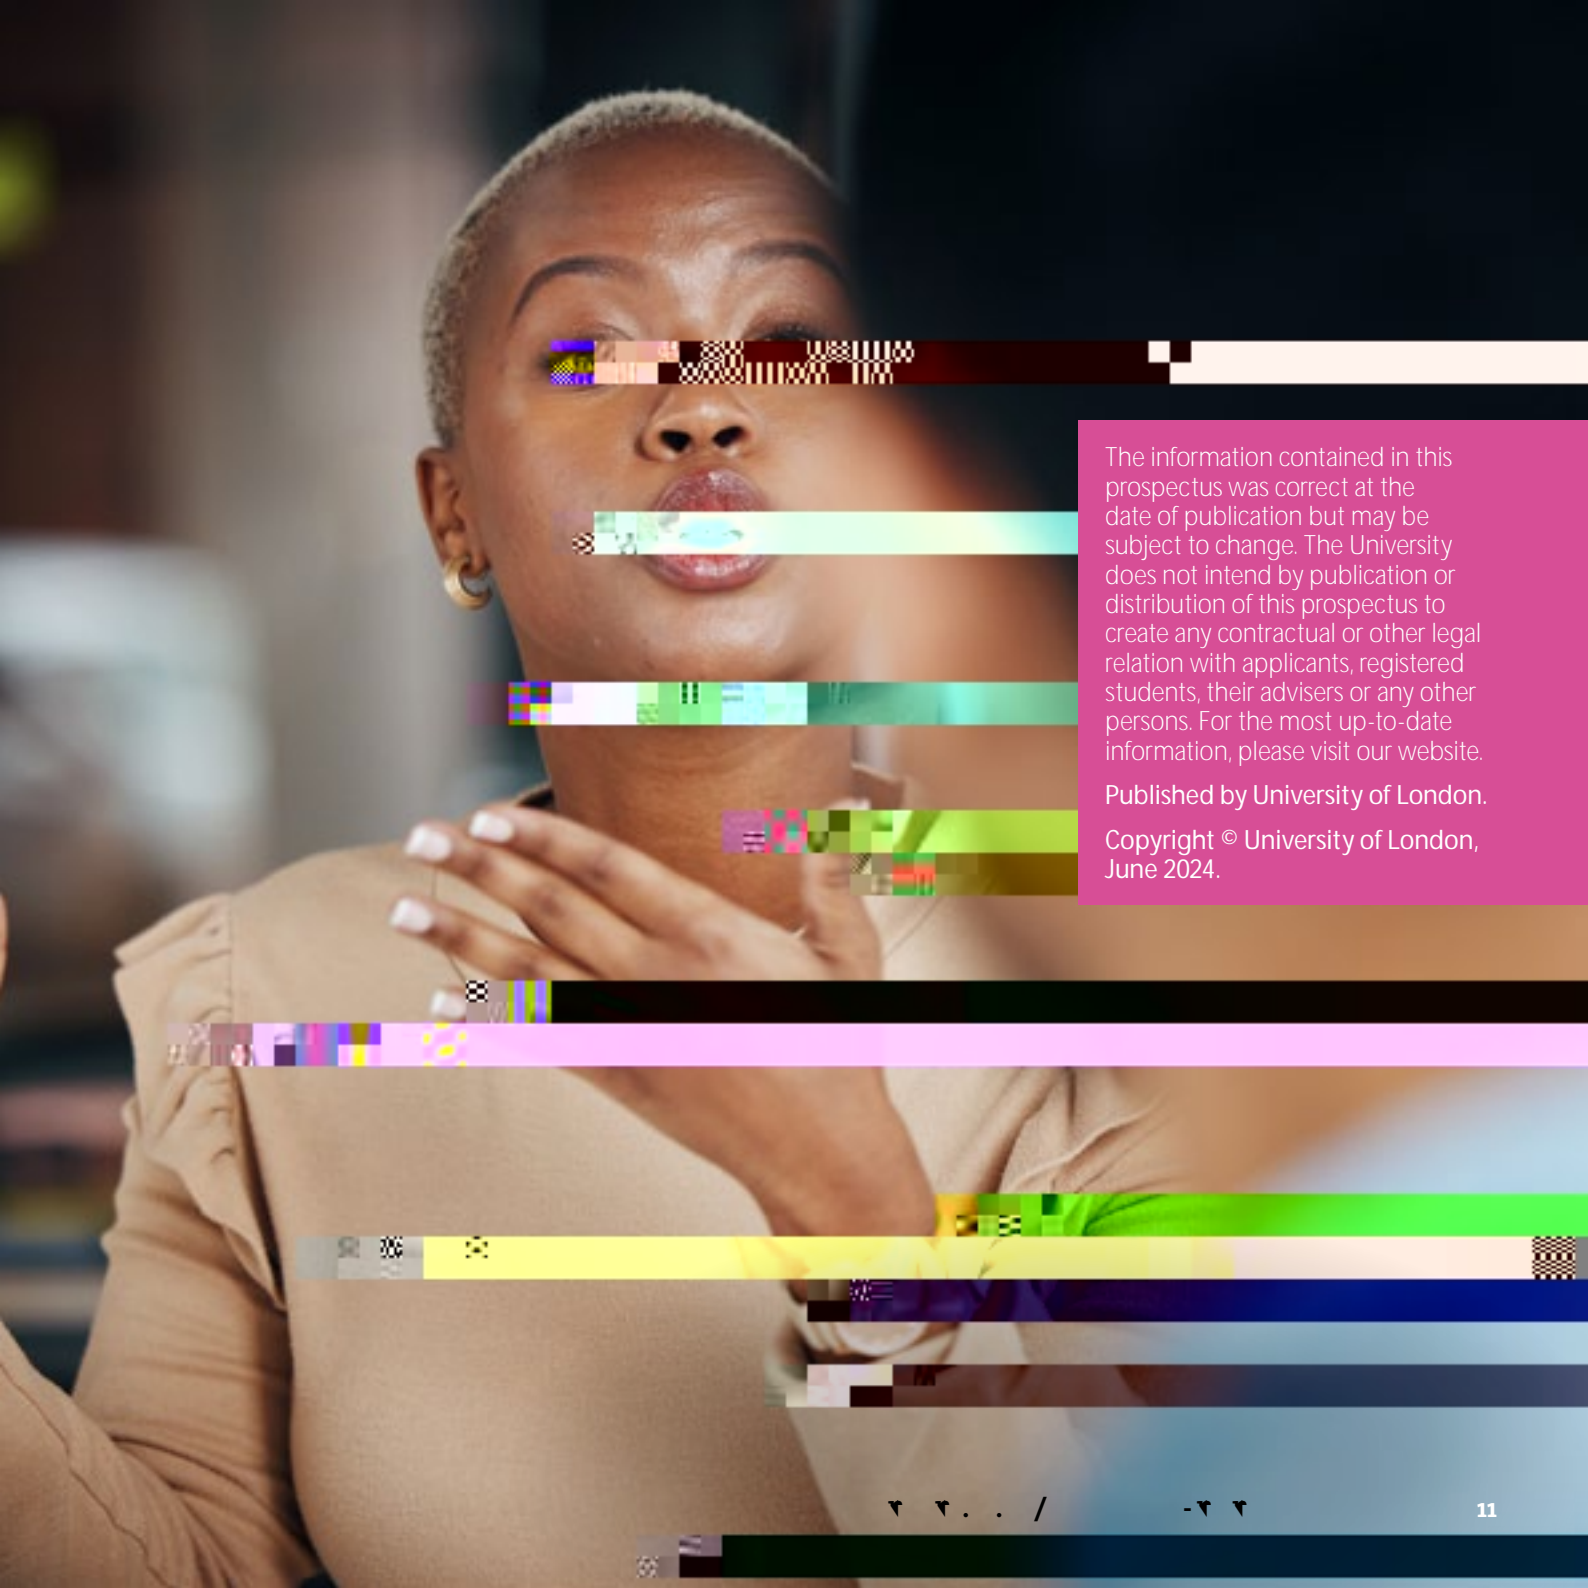

Even if you do not meet the standard requirements, we will consider each application on its own merits. Our Admissions Panel will consider whether any alternative/

incomplete qualifications or work experience you have are suitable for entry to the programme.

English language requirements

You must satisfy the English language requirements for the programme. Currently this is an:

- IELTS: overall score of at least 6.5 with a minimum of 6.0 in each subcategory or equivalent, obtained within the past three years.
